[Can You Mine Asch XAS On A Regular Computer](#)
3 Can the tokens (XAS/ETH/BTC/BTS) be used in the airdrop through the trading platform?
No, tokens must be transferred to the corresponding wallets before they can be used in the airdrop.. 1 Why can't
the binding address be generated when the 'Obtain' button is clicked on the website? The main cause for this problem is the
incompatibility of the web browser with the website.. Please participate in the airdrop using Google Chrome to avoid this issue
2 What's the official website of the CCTime airdrop? And which type of cryptocurrency can be used?
Official website: Cryptocurrencies supported by the airdrop are: XAS, BTC, BTS, ETH.
